Operating Systems

introduction

What is an Operating System (OS)?

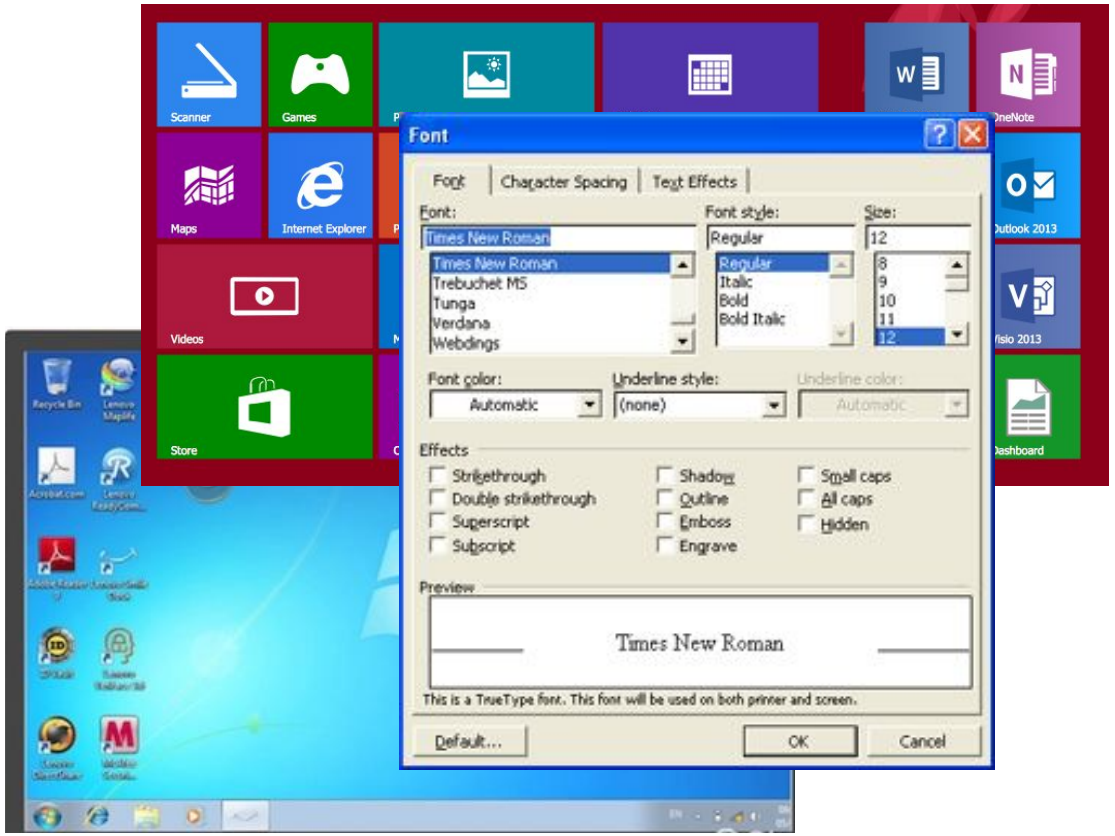

The OS manages system resources

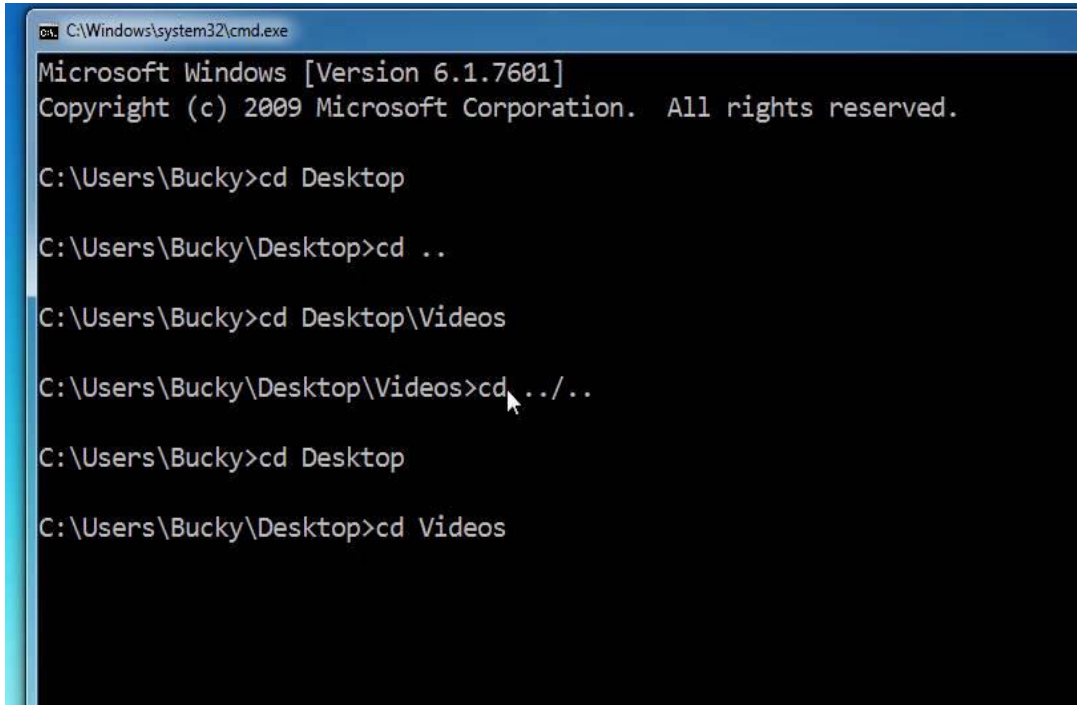

Types of User Interface

GUI (Graphical User Interface)

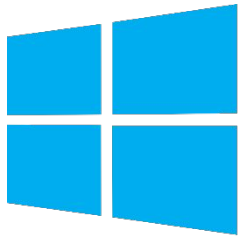

CLI (Command-Line Interface)

OS examples

For Desktop

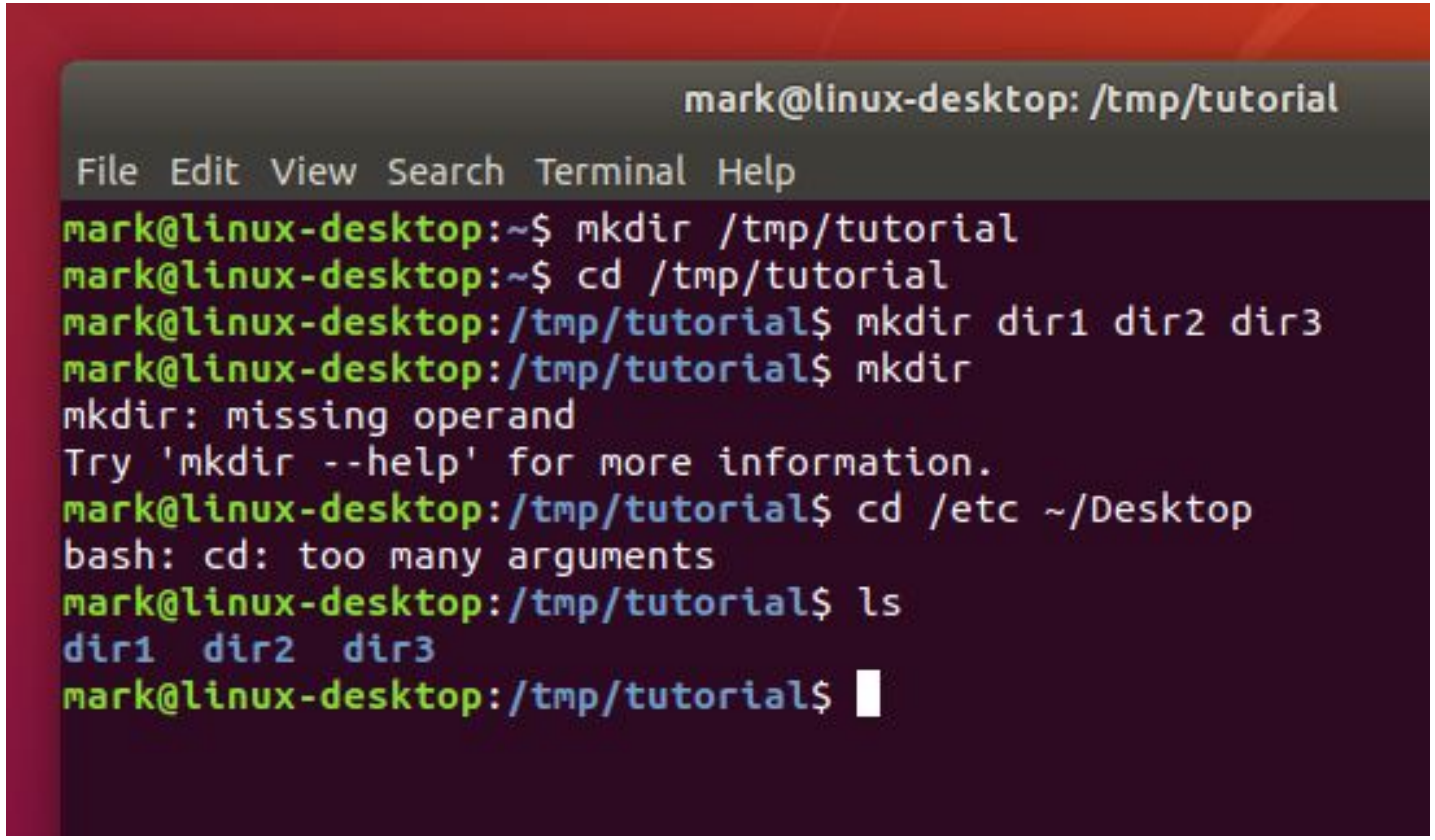

For Mobile Devices

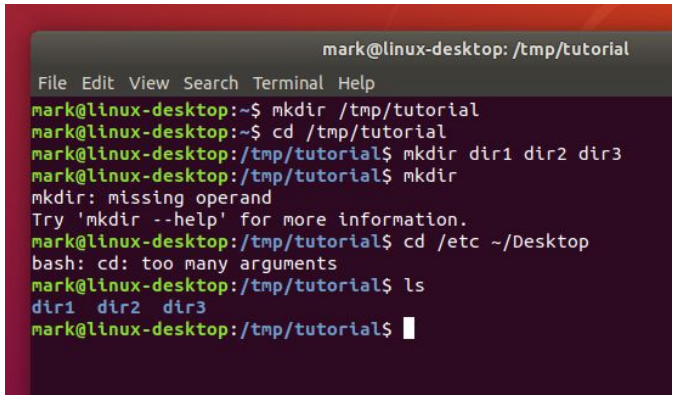

Linux Terminal

A Terminal is a CLI that allows us to type commands to the OS

Linux Shell and Kernel

A shell interprets the commands and executes them through the kernel

Terminal

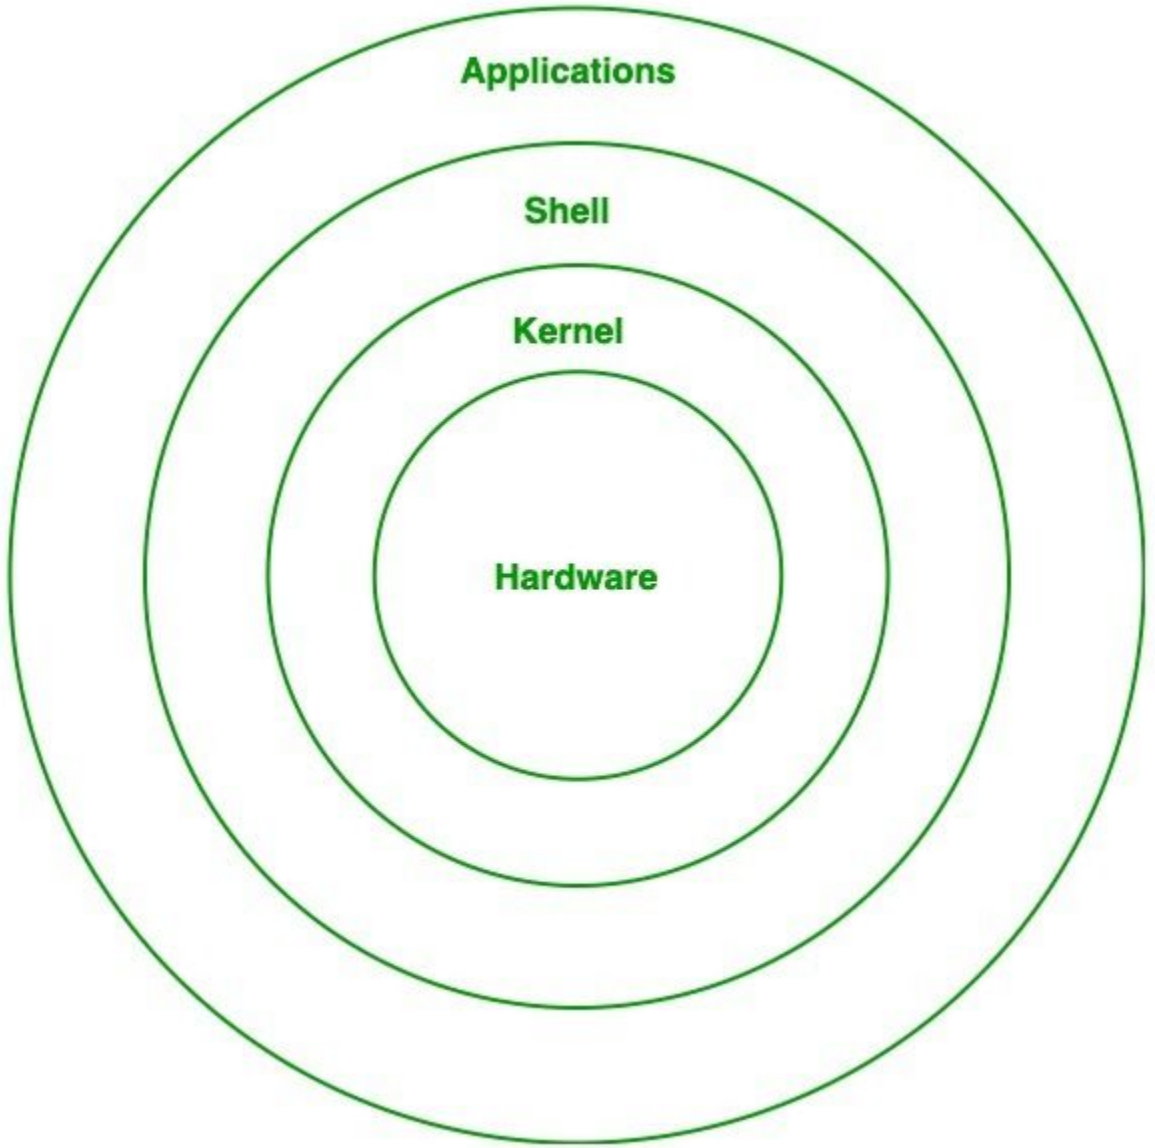

Linux default shell

Linux Kernel

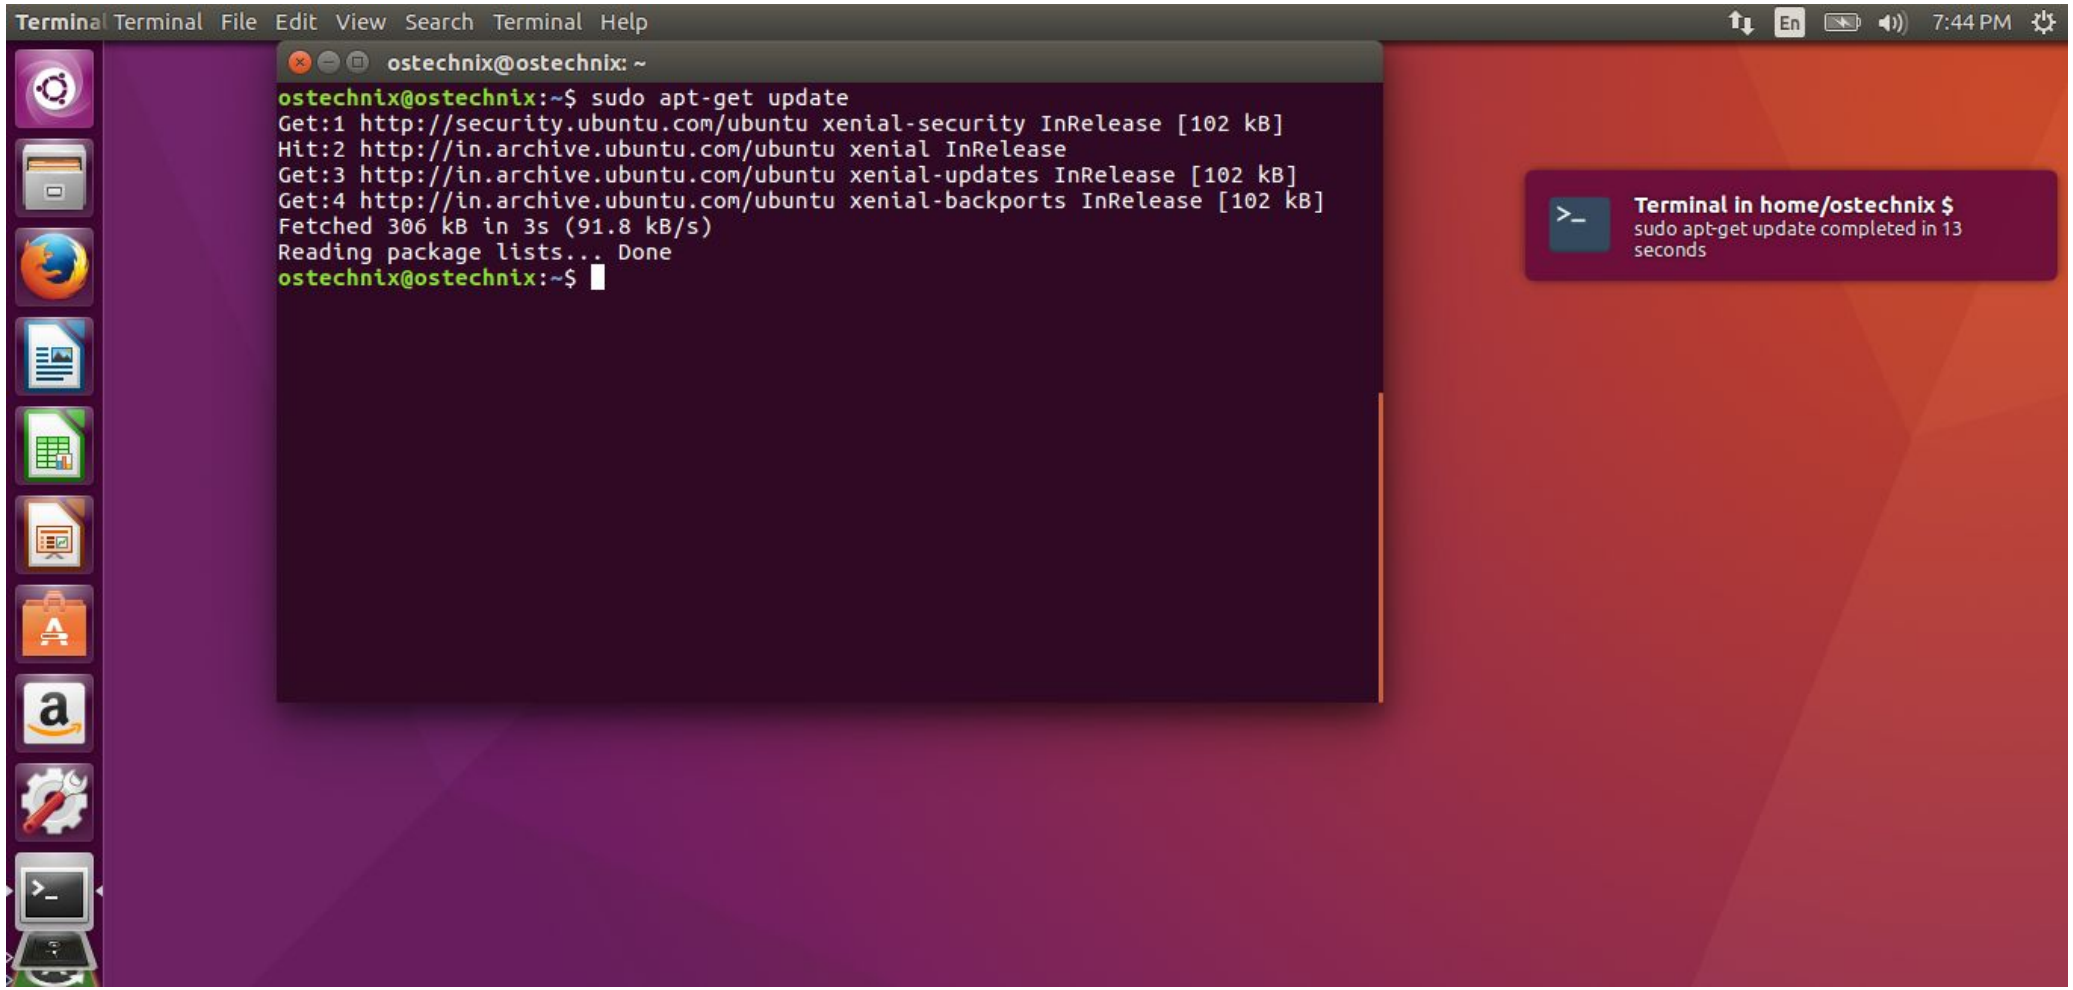

The kernel is the core (heart) of the OS. It communicates directly with hardware

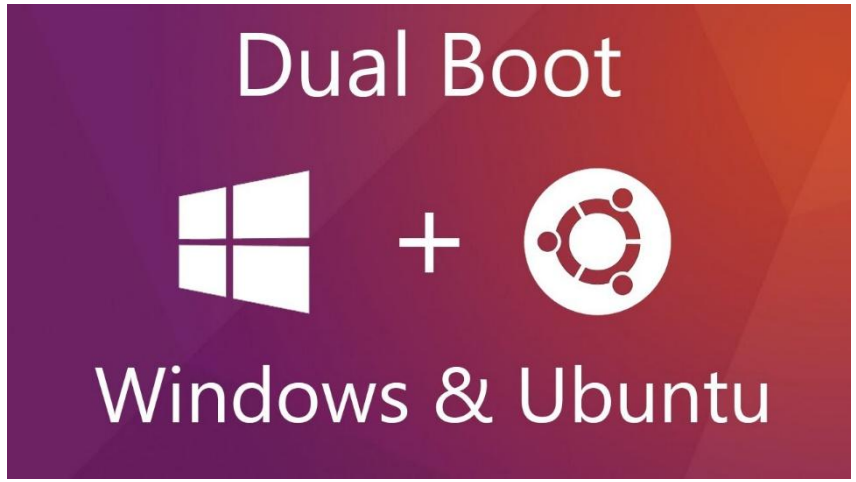

Linux Distributions

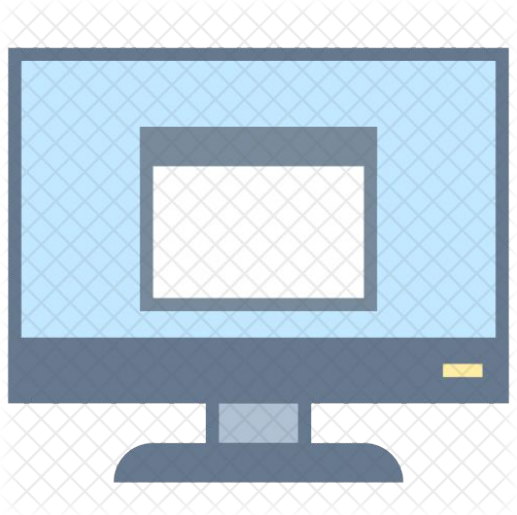

ubuntu
